EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance: The previously applied 35 U.S.C. § 102(f) rejection is withdrawn in view of the clarification that the named inventors are, indeed, the true inventors of the claimed subject matter. The previously applied 35 U.S.C. § 103(a) rejections based upon the Richardson reference are also withdrawn. After careful study, it is agreed that Richardson does not disclose or suggest the fabrication of quasi phase matched poled nonlinear structures in holey optical fibers. The Examiner concurs with applicant's analysis set forth on page 7 of the April 2, 2004, response. After very extensive further searching, the Examiner now agrees that the applicants of the present application were the first to achieve quasi phase matched poling in holey optical fibers. Accordingly, the device claims 1-14 herein, which require a core/clad optical fiber to be non-linearly poled so as to satisfy a quasi phase matching (QPM) frequency converting condition with the cladding comprising a holey structure for waveguiding confinement, are allowable over the prior art of record. Similarly, the method claims 15-19 herein, which recite poling an optical fiber which has a holey structure to generate a periodic non-linearity so as to satisfy a quasi phase matching (QPM) frequency converting condition, are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
